<u>**Write-Up: Enhancements to My Resume Website**</u>

For my resume website, I have applied several improvements using **CSS** to enhance the design, layout, and overall visual appeal. Below are the key changes I made:

1. Google Fonts for Improved Typography

- I integrated **Google Fonts** to give my website a more professional and readable appearance. I chose the **"Roboto"** font family for body text and **"Open Sans"** for headings to ensure clarity and consistency throughout the page.

2. Color Scheme for Visual Appeal

- I applied a simple yet effective **color palette** of soft, neutral tones with **a vibrant accent color** to make the text easy to read while keeping the design visually appealing. This color scheme was used consistently across headings, background, and text to enhance the user experience.

3. Navigation Bar Using Flexbox

- I created a **responsive navigation bar** using **CSS Flexbox**. This allows easy navigation to different sections of my resume, including **About**, **Education**, **Skills**, and **Contact**. The layout ensures that the navbar is flexible and adjusts based on the screen size, making the site mobile-friendly.

4. Dividing Content into Cards

- I divided my resume sections into individual **cards**, giving each section a clean and organized layout. These cards have subtle **box shadows** to create a sense of depth and separation between different sections of the page.

5. Responsive Design

- I used **media queries** to make the website responsive. The layout adapts to different screen sizes, ensuring that the content is easy to read on both mobile devices and desktops. For example, the navigation bar shifts to a vertical alignment on smaller screens.

6. Selectors and Structuring

- I used various **CSS selectors** (class, ID, and element selectors) to efficiently style and structure the content. Specific styles were applied to headings, sections, and navigation links to make the website visually appealing and user-friendly.

7. Footer and Contact Information

- I added a **footer** section at the bottom of the page, providing my **contact details** such as email and phone number, along with a copyright notice for the site.
